Flag Status: Red

Honorable Members of the Committee on Public Health:

I write you today representing the interests of the 15,000 residents, and approximately 7,000 homes located in the Town of Ledyard.

I speak in support of HB5477 and the specific provisions of Section 1. Subsection(g) (1) and (2).

Some months ago, a Local Health District proposed periodic inspections of every septic system in our town without regard to size, occupancy or presence of problems. The proposal claimed State Statutes required such mandatory periodic inspections with the attendant fees thereof going to the Health District.

This Bill adequately addresses "Public Health concerns or complaints".

Certainly those situations should receive attention and service.

I respectfully encourage your Committee to favorably advance this Bill and advocate for it's passage!

Fred Allyn, Jr.
Town of Ledyard
Office of Mayor
